

6th April 2014

## Antinuclear March for Life, 25th April – 5th May

**Across 6 departments, with 30 stopping points, an 11-day march.**

**For an immediate halt to nuclear power.**

**The Antinuclear Collective of the Vaucluse (CAN84), is organizing a third Antinuclear March for Life. It will take place from the 25 of April to the 5 of May in the Vaucluse, the Alpes de Haute-Provence, the Bouches-du-Rhône, the Gard, the Drôme and the Ardèche.**

The people of our region will be able to show, in the heart of the “nuclear triangle of death” - Cadarache-Marcoule-Tricastin-Cruas (the 4 civil and military nuclear sites in the Rhône-Durance valley) - their opposition to the threat of nuclear catastrophe in Provence.

To end once and for all the daily crime of nuclear destruction, immediately and unconditionally - that is the demand and the aim of the March, which will unite protesters on the 250 kilometre route.

At 30 stops in towns and villages, over 11 days, marchers will link the 4 nuclear power plants symbolizing a reckless industry which represents risk to the lives and health of the people in this region.

So that the greatest number of protesters can show their opposition to nuclear power, the entire march can be completed or participants can join stages in the mornings or afternoons, to suit. Join us on foot, on horseback, by bike, on rollerskates, on a donkey, or by any other means!

- **Each stop will provide an opportunity to meet local residents**, to inform them, to gather information and to call them to action against the crime of nuclear power. Photographs of victims of nuclear power will be shown
- **At each stop, local politicians will be called on to pass a resolution** in the *Conseil municipal* in favour of shutting down the nuclear plants which pose grave risk of radioactive contamination to life and health
- **At each stop at a nuclear power station**, a meeting will be offered to the workers and their union representatives
- **At each evening stop**, there will be films and debates, discussions of further action - and music. Marchers who play music are invited to bring their instruments along

Those wishing to join the Antinuclear March for Life can register with the organizers at: [collectifantinucleaire84@hotmail.fr](mailto:collectifantinucleaire84@hotmail.fr)

CAN84 invites individuals and associations to organise car-sharing to the relevant starting points.

CAN84 can supply a set of posters and flyers to be reproduced and distributed locally, an electronic image to circulate on the internet, and a route-map and program. *Meals and transport of belongings will be provided.*
